DETAILED ACTION

Response to Amendment

1. This Office action is in response to Applicant's amendment filed 26 October 2009, which amends claims 1 and 5.

Claims 1-17 are pending.

2. The rejection of claims 1-10, 12-18 under 35 U.S.C. 103(a) as being unpatentable over Baldo et al. (US 6,097,147) in view of Ueda et al. (US 2002/0122900 A1) is overcome due to applicants amending of the claims and persuasive argument in the reply filed 26 October 2009.

3. The rejection of claims 11, 15, and 16 under 35 U.S.C. 103(a) as being unpatentable over Baldo et al. (US 6,097,147) in view of Ueda et al. (US 2002/0122900 A1) and further in view of Fukuoka et al. (US 2001/0000943 A1) is overcome due to applicants amending of the claims and persuasive argument in the reply filed 26 October 2009.

4. The rejection of claim 17 under 35 U.S.C. 103(a) as being unpatentable over Baldo et al. (US 6,097,147) in view of Ueda et al. (US 2002/0122900 A1) and further in view of Igarashi (US 6,299,796 B1) is overcome due to applicants amending of the claims and persuasive argument in the reply filed 26 October 2009.

Drawings

5. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because: the captions of Figures (1) and (2) are in German. Corrected drawings with the caption in English must be submitted as Replacement Sheets (in addition to a marked up copy).

Allowable Subject Matter

6. Claims 1-17 are allowed.

7. The following is an examiner's statement of reasons for allowance:

The closest prior art, Ueda et al. (US 2002/0122900 A1), teaches similar spirobifluorene compounds for the light-emitting layer of organic electroluminescent devices. However the reference does not teach spirobifluorene compounds for the electron transport or hole blocking layers between the light-emitting layer and the cathode. While one of ordinary skill in the art may consider the use of spirobifluorene compounds in the electron transport layer obvious due to Ueda et al.'s teaching that a spirobifluorene compound forms an electron transporting luminescent layer, applicants have demonstrated unexpected results regarding the power efficiency and lifetime for organic electroluminescent devices as claimed when compared with the prior art (page 17 table 1 of the specification). The unexpected results are sufficient to rebut a prima facie case of obviousness because one of ordinary skill in the art "could ascertain a trend in the exemplified data that would allow him to reasonably extend the probative value thereof." *In re Clemens*, 622 F.2d 1029, 1036, 206 USPQ 289, 296 (CCPA 1980).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
